KFW recognizes **feminism as a dynamic force for social change that varies across age, ethnicity, economic class, geography, sexuality, and other differences. For this reason, KFW does not promote a single definition of feminism but encourages others to describe their own understanding and practice of feminism.*

*The KFW Board of Directors has defined positive **social change** outcomes as: eliminating societal barriers to women; neutralizing discrimination against women based on age, race, ethnicity, sexual orientation, physical ability, education, economic condition, and geographic origin; and producing actions, conditions, policies, attitudes and behaviors that benefit women.*
